

MGEU OCCUPATIONAL VISION CARE

prescription safety eyewear program

Through the Manitoba Association of Optometrists' Occupational Vision Care (OVC) program, MGEU Members can purchase prescription safety eyewear at a fraction of normal pricing (usually 1/4–1/3 of regular cost, depending on your vision prescription).

Prescription safety glasses are sold according to the frame, lens and professional fees pricing agreed to with MGEU.

Take your current valid MGEU member card and your current vision prescription to any of our participating locations. If you need a new eye exam, our optometrists would be happy to provide one (fees vary).

Pay at the optometrist's office. The optometrist's office will issue a receipt so you can submit a claim through any insurance coverage you may have (or to your employer if such an arrangement is in place).

Direct billing: Participating optometrists each have their own office policies. Ask the office you are visiting if they offer direct billing and can confirm your coverage.
